16 July 1957

MEMORANDUM FOR: Project Director

ATTENTION : [REDACTED]

25X1A

SUBJECT : Request for TSS/DDP to Build Equipment

1. In accordance with our conversation of 15 July, it is requested that you take the necessary steps to authorize TSS/DDP to build four antennas and RF preamplifier systems to be used with System One and cover the low frequency radar bands [REDACTED]. It is further requested that you provide one item each of the black boxes associated with Band one (or two) of System Five. You have these in your operations and the possession of them by TSS will greatly simplify this job.

25X1A

2. A general statement of the scope of the work involves the adopting of the flush-mounted antennas to be furnished to TSS into the space normally occupied by the System One antennas, the building of RF preamplifiers for these antennas, the possible construction of additional power supplies as needed and the testing of the entire system including a basic System One amplifier and recorder. Technical details will be provided by the ELINT Staff.
